

Building a Stronger Future: Grant-Funded Improvements at Grace House

At Grace House of Memphis, every improvement we make is about creating a safer, more supportive environment where women can focus on healing and rebuilding their lives. Thanks to a recent infrastructure grant, we have been able to make significant upgrades that enhance both security and comfort for our residents.

These improvements include enhanced security measures such as improved lighting, upgraded surveillance, and reinforced entry points—ensuring a safer space for everyone at Grace House. Beyond security, we've also remodeled the kitchen, making it more functional and welcoming for shared meals and community building. Additionally, at our Extended program, we've created an extra room, allowing us to accommodate three more clients, expanding our ability to serve women on their journey to recovery.

These changes are more than just renovations—they're investments in the future of the women we serve. With a safer, more comfortable, and more inclusive space, Grace House remains a place where women can heal, grow, and thrive. We are grateful for the support that makes this work possible, helping us extend hope and opportunity to more women in need.

Stay tuned for the Grand Re-Opening Event coming soon!
